• Reviewed and refactored legacy code bases and tested software for performance, integration and unit functionality.
• Decreased the average release time by 34% by adopting Azure DevOps pipeline.
• Led a team of 5 engineers in the migration of legacy software to .NET, significantly improving scalability.

SKILLS

- System Analysis
- Java Programing
- Algorithm development
- Springboot
- Software Development Life Cycle
- C# Programming
- Python
- React Native
- React.js.
- Azure & AWS
- Microservices
- Kubernetes
- RESTful API Development
- Expertise in ASP.NET Core
- Expertise in MySQL
- Expertise in MSSQL Server
- PHP
- Laravel
- Kubernatis
- Git
- GitHub
- CI/CD

ATIBA UNIVERSITY
Computer Science Lecturer April, 2021 - March, 2022
- Developed course outlines for semester courses.
- Intimated students with essential knowledge in various semester courses.
- Organized software development challenges for students to participate in so they can better appreciate concepts taught to them in class.
- Assessed the students and graded them accordingly.

METAL MATE LIMITED
Software Developer and ICT Manager Dec, 2020 - March, 2021
